

Procedures for Final Test on London Taught Course on Spectral Theory

Professor E. B. Davies

February 2013

The test will be sent out by email and will also be put on the web site of the course by 15 February, possibly earlier that week. It will consist of a single question that uses methods taught in the course. You may use any books you like, or the web, to gather information, but must acknowledge sources in the text, not just once at the end, and must write out the solution in your own words.

Your work on the test must be emailed to E.Brian.Davies@kcl.ac.uk by the end of February. Please make sure that it is readable before sending it and please try not to send too large a file. If you post it to Professor E.B. Davies, Department of Mathematics, King's College London, Strand, London WC2R 2LS, you must make and keep a copy first.

I will acknowledge receipt of your work for the test within three days. If you do not receive the acknowledgement you must contact me or, in the last resort, Nisha Jones at ucahnjo@ucl.ac.uk
